Basijn nr: 42/2020

IJmuiden, 27 augustus 2020

Onderwerp: Kleine sluis IJmuiden, tot nader order gestremd

The director of the Central Nautical Management North Sea Canal Area, who is also the (State) Harbor Master, announces the following:

Due to a temporarily reduced water discharge as a result of a defective pump at the pump / sewage sluice in IJmuiden, temporary replacement pump capacity will be installed at the Small lock from 1 August 2020. This water is pumped from the Zuiderbinnentoeleidingskanaal into the Small lock and then transported to the Zuiderbuitenkanaal. For safety reasons, the Small lock will therefore be closed at 07:00 hours until further notice with effect from 27 August 2020.

When the intended replacement pump capacity is used, this will be indicated by means of discharge signals and signs. Shipping is also informed by VTS. It is expected that when the replacement pump capacity is used, a flow velocity of 1 - 1½ m / s or 1.9 - 2.9 knots will be created at the outer door of the Small lock, which will decrease rapidly in the Zuiderbuiten supply canal. The pumping capacity of the IJmuiden pump / discharge sewer is expected to be restored between 9 and 12 months.

The previously issued basijn 34/2020 is hereby canceled.

Should you have any questions about this Announcement, please contact the Duty Operations Manager at the following telephone number: +31 205 234 692.

The Director of the Public Body Central Nautical Management, who is also the (State) Harbour Master
