Explanatory note

These decrees must be revoked due to the update to the Action Plan for seagoing vessels whose solid bulk cargo has been fumigated with phosphine abroad (hereinafter: Action Plan).

A company has developed a method for mechanically ventilating these cargoes. Various tests show that this method can be carried out safely. Since the method was not included in the Action Plan, an exemption was required before it could be used. The method of mechanical ventilation is included in the update to the Action Plan taking effect on 1 October 2026. The exemptions can therefore be revoked.
